COVER LETTER

To whom it may concern,

I am an experienced Web Developer with over 5 years total front-end design and development experience and an excellent understanding of the development lifecycle. My code stack includes technologies such as WordPress, HTML, CSS, JavaScript, jQuery and PHP. My IDE includes build tools and package managers such as NPM, SASS, Gulp JS, Babel, Composer and Git. I also have practical knowledge of Python, Django and React JS with exposure to Angular JS and Vue JS.

I am also well-versed with Adobe Creative Cloud and many of the programs in the suite such as Photoshop, Illustrator, Lightroom, InDesign, Premiere Pro, Dreamweaver and XD.

I am incredibly passionate about business automation and creatively solving complex problems through software.

During my time at [WebSports](#), which is an online scoring platform and admin system for provincial, club and school level sports contracted to Cricket South Africa I was responsible for completely overhauling the entire front end of the scoring platform in order to make it more user and SEO friendly. After the launch of the new website, users increased by 34%, sessions increased by 70% and the bounce rate decreased by 54%. The lighthouse score was also drastically improved.

Whilst I was with [Ride Expeditions](#), I was responsible for the development and maintenance of the company website, amongst other responsibilities. I implemented various automations within the company including automating the booking and enquiry system on the website where I built a custom API client which sent and received data to and from the Travel CRM system saving the company many man-hours and eliminating the need for additional admin staff.

I really believe that my vast skillset would be a great addition to your company.

Please feel free to contact me for an interview on +2774-693-3019 or via email at kayne.jeacocks@gmail.com. I look forward to hearing from you!

Kind regards,

Kayne Jeacocks
